HOW TO USE THESE MARKERS

Print: Use A4 at actual size (100%). Keep all four framed images intact.

Protect: Keep cards dry and flat; avoid glare or covering the pattern.

Place: Pine tree = A / Stage 1; stump = B / Stage 1. Left and right benches = A and B / Stage 2.

Scan: Start about 30-60 cm away. After both bench clues open, meet nearby and use the shared constellation sheet.

Finale: Both players meet at the lawn centre. No extra AR marker is required.

Existing setup: Use the current targets.mind. The framed recognition images are unchanged; no recompilation is needed for this rules update.
